

Swing Arm & Pedestal

BRIDGE LIGHTING ACCESSORIES

Tideland Signal provides lighting solutions that are popular worldwide for marking bridges and other structures over navigable waters.

Tideland offers lanterns for marking the center of the channel which are mounted below the bridge superstructure on a swing arm. The swing arm rotates on a bearing attached to the bridge mounting plate for ease of servicing and maintaining. Counterweight options are also available and made to specification for enhanced safety.

FEATURES

- Galvanised steel
- Stainless steel hardware
- Galvanised chain to assist in maintenance
- Custom swing arm lengths
- Counter weight option available made to order

In addition to a range of swing arms Tideland is also able to supply a range of standard and custom support pedestals for use on existing structures. No bridge is identical and our engineering division has the capability to customize to your needs.
